

METHOD AND SYSTEM FOR DATA OBJECT TRANSFORMATION

ABSTRACT

5 In accordance with an aspect of the present invention, a method of data
object transformation is disclosed. The method includes receiving a message
from a communications line, the message including one or more data objects of
a first object type, wherein the message is in a first communications format,
converting the message from the first communications format to a second
10 communications format, converting the one or more data objects from the first
object type to a second object type, wherein the one or more data objects are
converted using a first set of one or more transformation classes, each of the
one or more transformation classes generated using mapping rules, and
transmitting the converted one or more second object type data objects to an
15 application.
